** GUIDELINE:

Deep sedation/general anesthesia is a covered benefit only when in conjunction with covered oral surgery and pedodontic procedures when dispensed in a dental office by a practitioner acting within the scope of his/her licensure; and when warranted by documented conditions that local anesthetic is contraindicated. General anesthesia, as used for dental pain control, means the elimination of all sensations accompanied by a state of unconsciousness. Patient apprehension and/or nervousness are not of themselves sufficient justification for deep sedation/general anesthesia or intravenous conscious sedation/analgesia.
